Technology after the bubble
on the cover

Technology after the bubble
James M. Manyika and T. Michael Nevens
IT will rise again—but only if the providers learn how to help their customers make money.

features

Edging into Web services
John Hagel III
Automating the flow of information among companies is costly and complex. Web services promise to make it cheap and easy.
Who's accountable for IT?
Dan Lohmeyer, Sofya Pogreb, and Scott Robinson
Business leaders—that's who.

How to rescue CRM
Manuel Ebner, Arthur Hu, Daniel Levitt, and Jim McCrory
Even dysfunctional CRM systems may be well positioned for future success. The trick is to step back and think about your real goals.

Intellectual property: Partnering for profit
Jeffrey J. Elton, Baiju R. Shah, and John N. Voyzey
Companies could earn up to 10 percent of their operating income from the sale of patents and proprietary processes. But how?

Reprogramming European cable
Wendy M. Becker, Luis Enriquez, and Lila J. Snyder
European cable companies are in dire financial straits. The reason? Not just debt but a strategy that has produced negative cash flows across the whole industry.

Managing a sprawling service business
Hoyoung Pak, Cody Phipps, and Tom Spathis
Executives no longer have to rely on rules of thumb to manage geographically dispersed service networks. A new set of tools provides solutions for individual markets.
